management consulting

# Additional documents should be handled in the supply chain

-  = TI, Transaction Identity
-  = TH, Transaction History
-  = TS, Transaction Signature

# Document specifications

- TI includes:
  - Name of the product
  - Strength and dosage form
  - NDC
  - Container size
  - Number of containers
  - Lot number
  - Transaction date
  - Shipment date
  - Name and address of previous and subsequent owner

- TS is a signature that:
  - Party is authorized under the act
  - Received product from authorized party
  - Received TI and TS from previous party
  - Did not knowingly ship suspect or illegitimate product
  - System and process to perform verification
  - Did not knowingly provide false or altered/changed information

- TH includes:
  - Transaction information for each prior transaction back to the manufacturer

Successful changes.
